

Interactive Solutions

Digital Signage

With digital signage as the wave of the future, TouchSystems is focused on providing enhanced, high quality touch technology solutions. Whether your need is for a small retail kiosk to a large lobby display, Touch Systems offers several markets a multitude of sizes ranging from as small as 6.4" up to a 103".

Education

TouchSystems makes it easy to share sophisticated messages and media to enhance campus life by informing students about events, administrative announcements, and emergency notifications. Display your visual communications at specific campus locations and allow students to interact with the information you provide.

Corporate/Hospitality/Banking

Whether being used to welcome and direct guests, keep customers informed while they wait in line at the bank, or display important employee information, an TouchSystems interactive display solution is the perfect addition to any corporate environment, and will give you the flexibility to display the information you want to the audience of your choice.

Religious Institutions

An increasing number of churches and religious institutions are utilizing a digital signage system to reach out to their members to communicate events and schedules. It is impossible to interact with each individual considering the number of people streaming in and out of your church. Increase communication with your congregation through an interactive TouchSystems digital signage system.

Medical

With usage models ranging from placement in the waiting room to help facilitate customer check-in to placement in the operating room to help deliver quick and reliable information, an interactive TouchSystems digital signage solution goes a long way to increase efficiency in an environment where efficiency is critical.

Government

As one of the earliest adopters of touch devices, government facilities have benefited from this level of interaction for years. TouchSystems can supply government buildings with the specific interactive digital signage needed to maximize productivity.

Factory Automation

Reduce paper consumption and data entry time by implementing a TouchSystems interactive solution. Our systems allow factory workers to focus on coming up with the next technological breakthrough
