

# Enhance your healthcare environment with NEC digital signage solutions

## Engage your patients, visitors and employees alike with brilliant high-performance displays.

Digital displays offer hospitals the flexibility of using photo images, movie files or even relevant news feeds to interact with patients and visitors—starting with relatively simple solutions. With easy updates utilizing your existing network, your healthcare environment can automatically feel de-cluttered and up-to-date just by eliminating bulletin boards and going digital. NEC display solutions aid not only in signage needs, but also in efficient traffic flow and emergency information broadcasting, enhancing the total healthcare experience.

### NEC digital signage solutions:

- » **optimize your advertising.** Drive traffic to your gift shop or promote monthly fundraising events.
- » **enhance the waiting room.** Provide a more relaxing atmosphere with live TV, along with news and weather feeds.
- » **allow you to connect with your patients.** Alert them to offerings that aren't normally promoted, like chapel hours or hospital-sponsored classes and services.
- » **let you control content through the web.** Hospital staff across departments can easily access the display network through any browser, putting less of a burden on it.

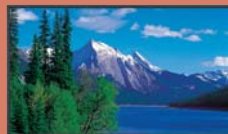

Liven up your hallways and cafeterias...digital signage can provide visual impact.

## HIGHLIGHT PRODUCTS

### 40" NEC MultiSync LCD4020

- Built-in expansion slot allows for seamless integration of third-party components
- Optional single board computer processes your digital signage content and eliminates the need for an external PC, cabling, mounting and power supply

### 52" NEC MultiSync LCD5220

- Professional-grade panel leads to less image persistence and a longer display life
- Ultra-thin bezel (19mm) helps create near-seamless video wall configurations
- Durable, sealed module prevents contaminants and dust in uncontrolled environments
